Application for Internship – Almaty City Development Center JSC

Dear Selection Committee,

I am writing to express my interest in the internship opportunity at the Almaty City Development Center JSC. As a 3rd-year Computer Science student at Kazakh-British Technical University, I am excited about the prospect of contributing to Almaty's digital transformation initiatives through real-world projects in IT, data analytics, and Smart City development.

My academic and project experience has equipped me with strong skills in software engineering, web technologies, and AI-powered solutions. Notably, I developed an AI chatbot for Online Standart, which enhanced customer engagement through automation. I am proficient in Python, JavaScript, Angular, and Django, and have hands-on experience in both frontend and backend development.

In addition to my technical background, my experience as an English Language Instructor and Translator has strengthened my communication, adaptability, and teamwork skills—qualities I believe are essential for contributing effectively in cross-functional CRA teams.

I am enthusiastic about the opportunity to work under the guidance of professionals from the Akimat of Almaty and gain practical experience that can lead to long-term collaboration. I have attached my resume for your review and would be happy to provide any additional information if needed.

Thank you for considering my application. I look forward to the opportunity to contribute to your impactful work.

Sincerely,
Azizullah Darmani
