

# AZIZULLAH DARMANI

## PROFILE

A highly motivated and adaptable Computer Science student with a strong foundation in web development, AI tools, and problem-solving. Passionate about building scalable and efficient software solutions, I have hands-on experience in backend development with Django and frontend technologies like React. I am particularly skilled in leveraging AI tools to enhance software development, having built an AI-powered chatbot for a Turkish company, Online Standart. My ability to integrate artificial intelligence into web applications sets me apart, and I am eager to continue developing innovative AI-driven solutions.

For more details on my AI chatbot project, visit my [LinkedIn profile](#) or check it live at [onlinestandard.com](#)
